## Opdracht 1 – Positioneren van afbeeldingen

CSS laat afbeeldingen links/rechts zweven per artikel en geeft alles wat ruimte en stijl. Om en om worden de afbeeldingen links en rechts geplaatst.

```
body {  
    font-size: 1.25em;  
    font-family: Arial, Helvetica, sans-serif;  
}  
  
article:nth-child(2n+1) img {  
    float: left;  
}  
  
article:nth-child(2n) img {  
    float: right;  
}  
  
img {  
    margin: 0 10px 10px 10px;  
}  
  
article {  
    margin: 10px;  
    display: inline-block;  
    border: 1px solid black;  
    padding: 10px;  
}
```

## Opdracht 2 - Airbus

Voor de AIRBUS-website vind je hieronder de CSS:

```
body {  
    width: 95%;  
    margin: 0 auto;  
    font-family: Arial, Helvetica, sans-serif;  
}  
  
header {  
    height: 200px;  
    background-image: url("../images/bgsky3.jpg");  
    background-repeat: no-repeat;  
    background-size: cover;  
    text-align: center;  
    color: #00008a;  
}  
  
header .paginatitel {  
    font-weight: bold;  
    font-style: italic;  
    font-size: 300%;  
}  
  
header .onderstetitel {  
    font-weight: bold;  
    font-size: 240%;  
}
```

```
